Quoi de n’œuf, Python ?

Jeudi 3 mars 2022 (Python Rennes)

Sortie de Python 3.11

Cf. What's New In Python 3.11

- 1re sortie non-beta de `black`
- version 8.0 de `IPython` (shell interactif Python, kernel Python des notebooks Jupyter) : 250 PR, auto-complétion
- lisibilité améliorée des `tracebacks`

typing.Self et *fluent API*

```
class Person:
  def set_firstname(self, firstname: str) -> 'Person':
    self.firstname = firstname
    return self

  def set_lastname(self, lastname: str) -> 'Person':
    self.lastname = lastname
    return self
```

```
suzy = Person().set_firstname('Suzy').set_firstname('Q')
```

```
from typing import Self
class Person:
  def set_firstname(self, firstname: str) -> Self:
    self.firstname = firstname
    return self

  def set_lastname(self, lastname: str) -> Self:
    self.lastname = lastname
    return self
```

cPython en web-assembly

REPL Python dans le navigateur:

https://repl.ethanhs.me/

```
>>> import sys
>>> print(sys.version)
3.11.0a4+ (heads/main-dirty:b1a3446, Jan 25 2022, 10:19:07) \
    [Clang 14.0.0 (https://github.com/llvm/llvm-project \
    f142c45f1e494f8dbdcc1bcf1412
```

- intepréteur cpython compilé en web-assembly
- 5 Mo

Téléchargements PyPI : 1,5 Po / jour

https://twitter.com/di_codes/status/1499064704899194
text}

```
looks like @pypi's bandwidth just crossed 1.5PB/day
and I'm honestly not sure if I should be proud or terrified
```

1.5 Po = 1.5 million de Go

À toi Nicolas !
